## Summary

I am a motivated Computer Science undergraduate at the Informatics Institute of Technology (IIT) with a strong interest in technology, problem-solving and continuous learning. I have built a solid foundation in programming, analytical thinking and teamwork through academic projects and I am currently seeking a **Software Engineering** internship to gain practical experience and further develop my skills, while also exploring opportunities to contribute to intuitive and user-friendly digital solutions.

## Project Experience

**AI-Based Employee Performance Risk Prediction System**
(Python, Pandas, Scikit-learn, Random Forest, Streamlit, Joblib)

- Developed a machine learning-based system to predict employee performance risk levels using attendance, absenteeism, task completion, task rating and previous performance score.(Github repo: https://github.com/disdyy/ai-employee-performance-risk-prediction.git)
- Key Learnings: Trained and evaluated a Random Forest classification model, saved the model using Joblib and integrated it into a simple Streamlit web application for real-time predictions.

**PerformEdge HR System Tracking Dashboard Web Application**
(Tailwind CSS, FastAPI (Python), MySQL, REST APIs, Chart.js, Axios, JWT Authentication, Git.)

- Developed PerformEdge, a full-stack web-based HR dashboard for managing employee data, attendance and performance. (https://performedge.me/)
- Key Learnings: Implemented attendance features across database, backend APIs, frontend dashboards, login flow and reports in a group project.

**PerformEdge UI Design**
(Figma)

- Designed the PerformEdge user interface using Figma, focusing on intuitive layouts and user-friendly dashboard experiences.
- Key Learnings: Figma UI design

**Property Search Web Application**
(React, Vite, JavaScript, CSS)

- Built a responsive web application to search and view property listings, apply filters, manage favourites and explore detailed property information
- Key Learnings: Developed complete React/Vite single-page application using reusable components, React Router, JSON-driven property data and basic unit testing.

**Personal Portfolio Website**
(HTML5, CSS)

- Developed a responsive personal portfolio website to showcase profile information, projects and contact details with a clean multi-page design. (https://disdyy.github.io/Personal-Portfolio/)

**Traffic Data Analysis System**
(Python, CSV module, Tkinter)

- Developed a Python-based application using CSV and Tkinter to validate input dates, process traffic survey datasets, generate statistical reports, and visualize hourly vehicle flow using histograms.
- Key Learnings: Python programming

## Education

**Bachelor of Science (Honours) in Computer Science** *(2024 - Present)*
Informatics Institute of Technology (IIT) affiliated with University of Westminster

**Certificate in Computer Science** *2024*
National Institute of Business Management (NIBM)

**GCE Advanced Level** *2023*
St.Lawrence's Convent. Colombo 06

**GCE Ordinary Level** *2020*
Holy Family Convent. Dehiwala

## Skills

**Technical Skills**

- Python,Java, JavaScript,TypeScript
- HTML5,CSS3, React.js, Bootstrap, Tailwind CSS
- MySQL
- Github, Vite

**Soft Skills**

- Team Collaboration
- Communication
- Time Management
- Problem Solving
- Critical Thinking
- Adaptability

**Languages**

- English
- Sinhala

## Extra-curricular Activities

- Participated in Hult Prize Competition at IIT
- Member of Leo Club at IIT
- Senior Prefect - Holy Family Convent. Dehiwala (2019-2020)
- Member of Western Band and Senior Choir
